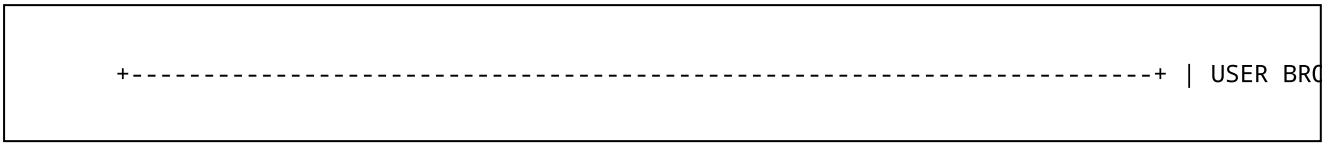
STAFFSYNC PRO

DOCUMENTATION: PHASE 4 — SYSTEM DESIGN & ARCHITECTURE

Project Name: Nehal_StaffSync | Platform: MERN Architecture

1. PROBLEM-SOLUTION FIT MATRIX

IDENTIFIED MARKET GAP / PROBLEM	STAFFSYNC TECHNICAL SOLUTION	MEASURABLE IMPACT
Unsecured spreadsheet-based employee records.	Encrypted MongoDB collection with JWT security.	Zero data leakage & total audit compliance.
Slow retrieval of departmental information.	Indexed REST API with fast search parameters.	90% reduction in record lookup duration.
Lack of user role segregation.	Role-Based Access Control (RBAC) middleware.	Strict access isolation per user role.


2. HIGH-LEVEL SYSTEM ARCHITECTURE DIAGRAM
